

Helpful Hints

- If you have sensitive skin, rub an ice cube over the area first to numb it a bit.
- Always apply wax in direction of hair growth. Remove in opposite direction.
- To calm skin after waxing, immediately apply pressure to epilated area with cushion of your fingers or palm of your hand.
- Strips may be cut lengthwise to fit smaller areas.
- Avoid waxing just before or during the first days of your menstrual cycle as skin is more sensitive at this time.
- Protect countertop surfaces with a towel.
- Soft Face Wax is water soluble. To remove from skin or surfaces, simply rinse with lukewarm water.

WARNING

- Never re-apply wax to newly epilated areas.
- Do not use on irritated, cut or broken skin.
- Do not use inside nose and ears, or on nipples, eyelashes, warts, moles and internal genital area.
- Do not use if you have varicose veins, diabetes, phlebitis, chapped sore or sunburned skin, recent scar tissue, eczema or any skin disorder.
- Do not use if you are using Retin-A, Accutane, Glycolic Acid, and Alpha Hydroxy treatments.
- Do not use soaps, astringents or alcohol based products for 2 hours after application.
- Avoid the sun, tanning and hot water for 8 hours before and after any hair removal treatment.
- Do not wax more than once every 10 days.
- Do not rub or scratch area after waxing to avoid irritation.

DO NOT HEAT WAX

No Heat Needed

Infused with Lavender,
Aloe & Arnica

FOR BEST RESULTS: Please read this entire booklet carefully before beginning your treatment.

instruction booklet

SurgiCare® Ready-To-Use Soft Face Wax

Important: New Users, Please Test First

Before using SurgiCare Ready-To-Use Soft Face Wax, please perform a small patch test at least 24 hours before actual use to check for sensitivity. It is also best to treat a small area first until you have perfected the technique.

After performing your test, apply SurgiSoothe™ Replenish Lotion. If redness or irritation develops within 24 hours, discontinue use. You may be sensitive to one or both products and should not use them. If no irritation appears, you may proceed with use.

INSTRUCTIONS

1. CLEANSE

Use the specially formulated Cleanse & Prep Gel to clean skin. Pat skin dry.

Upper Lip

2. REMOVE

Dip spatula into the center of the jar and scoop up wax, wiping off one side of the spatula on the lip of the jar. Apply to upper lip in a downward motion from center lip to one corner of mouth. Refer to illustrations below.

Immediately apply cloth strip over wax and rub strip firmly in the direction of hair growth.

Hold skin taut with one hand. With the other hand, pull strip off parallel to the skin with one quick motion in the opposite direction of hair growth. Do not pull strip straight up.

Repeat process on the other side of upper lip.

Repeat process on center area of the upper lip.

Remove any remaining wax with lukewarm water and pat dry.

3. SOOTHE

Apply calming SurgiSoothe™ Replenish Lotion to newly waxed areas. It will restore skin's normal pH balance and help retain skin's natural moisture.

Eyebrows

(Step #1 Cleanse and Step #3 Soothe are same as above.)

2. REMOVE

Dip spatula into the center of the jar and scoop up wax, wiping off one side of the spatula on the lip of the jar. Apply wax beginning under the brow at the bridge of the nose. Refer to illustrations below.

Follow the natural brow line with a steady flow of wax, moving toward the outer corner of the eye.

Immediately apply cloth strip over wax and rub strip firmly in the direction of hair growth.

Hold skin taut with one hand. With the other hand, pull strip off parallel to the skin with one quick motion in the opposite direction of hair growth. Do not pull strip straight up.

Repeat process for other eyebrow.

Remove any remaining wax with lukewarm water and pat dry.

Note: Use a similar procedure for removing unwanted hair above and between the eyebrows.

Chin

(Step #1 Cleanse and Step #3 Soothe are same as above.)

2. REMOVE

Dip spatula into the center of the jar and scoop up wax, wiping off one side of the spatula on the lip of the jar. Apply in the desired area.

Follow the natural hair growth line with a steady flow of wax.

Immediately apply cloth strip over wax and rub strip firmly in the direction of hair growth.

Hold skin taut with one hand. With the other hand, pull strip off parallel to the skin with one quick motion in the opposite direction of hair growth. Do not pull strip straight up.

Remove any remaining wax with lukewarm water and pat dry.
